

# INTRODUCING SUPPLIER FINANCING WITH

**invoicexcel**™ 

An **easy, cost effective** way to unlock the value of your purchase orders and invoices.

Bamboo Rose has teamed up with Seaport Global, a full-service independent investment bank, to offer invoiceXcel (iX): an online, low cost pre-shipment and invoice financing solution to vendors worldwide. Vendors that use our software told us their current financing options are not providing sufficient, cost effective liquidity to efficiently aid in driving growth. This was especially true for those wanting to accept larger orders but couldn't because of insufficient cash flow. iX is designed to solve this problem.

By teaming up with Seaport Global and leveraging our vendor relationships and platform, we are able to offer a cost effective, automated financing solution to vendors. iX does not require any invoice or payment processing changes for you or the vendor. It is compatible to any type of financing program offered to your suppliers and typically extends the reach of supplier financing by helping vendors not addressed by current programs offered.

## invoiceXcel Benefits

invoiceXcel combines the intelligence of the Bamboo Rose Platform with Seaport Global’s finance expertise for an easy-to-use, cost effective financing option.

### iX helps secure your supply chain while you optimize trade payable days

Many companies have a mandate from finance to optimize trade payable days, which often puts a sizeable number of suppliers at risk. iX can address 100% of your vendor base with an easy-to-use, cost effective solution.

### iX is a complimentary offering to financing programs you may already offer

Does not have to be an either/or decision for your vendor base. In fact, iX increases the reach of financing to your vendor base.

### iX offers competitive rates, higher advance rates and larger facility sizes to the vendor

- Up to 1/3 less than competitor’s rates for both pre-shipment and invoice financing
- Up to 100% advance rate
- No system or process changes

## How It Works

### VENDOR SIGNS UP

iX assesses your company, as credit is based on the customer’s credit, not the vendor’s (similar to many financing products).

### RATE DETERMINED

The rate is then determined by the credit team, then accepted by the vendor.

### DATA PIPELINE

No manual effort by the vendor or buyer. The online platform automatically showcases invoices eligible for early payment.

### INVOICE SELECTION

Vendor selects from one up to all invoices for early payment. Funds are deposited into the vendors account as quickly as the same day.

### VENDOR PAYMENT

You pay as usual into the bank account communicated to you by the vendor.

#### About Seaport

invoiceXcel was launched by Seaport Global and directly benefits from Seaport Global’s diversified and institutional capital raising expertise. Seaport Global is a full service, mid-sized investment bank offering capital market advisory, sales, trading and research services. Headquartered in NYC and New Orleans, Seaport Global has over 375 employees in offices across the US and Europe. Seaport Global saw a change happening in the marketplace. Large corporates were extending the time it takes to pay their supply chain. Understanding that it’s difficult for many of these businesses to secure a bank loan and many working capital providers were charging exorbitant fees, Seaport Global saw an opportunity to help business like yours. invoiceXcel was launched with the goal of aiding companies to unlock the value in their invoices and address their working capital needs.
